ELECTRONICS, POWER, COMMUNICATION, CONTROL, AND INSTRUMENTATION SYMPOSIUM

TOPICS

Adaptive control, Antennas, Biomedical electronics, Cognitive radio, Computer-aided – electronics design and technology, Control of infinite-dimensional systems, Control theory and applications, Cooperative communications, Device material and manufacturing technology, Embedded systems and SoC design, Geometric control theory and applications, Green design for VLSI and microelectronic circuits, Heterogeneous networks, Industrial automation and control systems technology, Information theory and coding systems, Intelligent control, Internet of things, Machine-to-machine (M2M) communications, Mobile computing, Multimedia communications, Network security, Photonic and optoelectronic circuits, Computational methods and reliability, Electricity markets and business models, Energy conservation and efficiency, Energy storage, FACTS, Future integrated electric power system, HVDC, Integrated energy system planning, Microgrids and remote communities, Policies and smart grids, Power electronics, Propagation and channel modeling, Radio resource management and optimization, Renewable energy: generation and integration, RF devices and circuits, Robotics and autonomous systems, Robust and nonlinear control, Satellite communications, Signal processing for communications, Smart grids: existing and emerging technologies, Spread spectrum systems, Ultra-wideband technology, Vehicular communication systems, Wireless Ad-hoc and sensor networks, and Sensors and sensor systems.

PUBLICATIONS

The accepted and presented papers **will be submitted** to the journals/proceedings that are indexed by Scopus/DOAJ.

[READ AUTHOR POLICIES](#)

COMMITTEES

Coordinator: Dr. Ronald Adrian

Members:

Dr. I Wayan Mustika

Unan Yusmaniar Oktiawati, Ph.D.

Fikri Waskito, M.Eng.

Yuris Mulya Saputra, M.Sc.
